Pioneering in America, from the first mile to the last. This is what drives us!

For more than 160 years, Siemens has been an integral provider of infrastructure, electrification, and transportation solutions in the United States. Automation's impact on the railway industry is second only to the effects of digitalization. Combine them and the results are transformative! We work at the leading edge of this movement, applying our proven expertise in digitalization to rail infrastructure and automation.

Our innovative solutions deliver greater safety, punctuality, reliability, and sustainability across the line, all while reducing costs for mass transit and freight transportation systems. We are continuously developing new answers for rail automation – often to questions that haven't been asked yet.

We're proud to be Great Place to Work® certified—a reflection of our commitment to creating an environment where innovation thrives and every voice matters. Apply today and be part of shaping the future with us!

Position Overview:

Siemens Mobility Rail Division seeks an experienced Mechanical/Production Engineer for a full-time, on-site position in Sacramento, CA. The primary responsibility is to provide engineering support for

the fabrication and assembly of rail carshells and bogies in a fast-paced production environment. The role involves daily collaboration with shop personnel, Quality Assurance, and customer inspectors, ensuring design specifications are met on the factory floor while maintaining top safety and quality standards in the rail industry.

What your day-to-day will look like:

• Provide engineering-based solutions/guidance on production related issues, utilizing industry standards, approved processes, root cause analysis, and best engineering practices.
• Accurately discern when proposed changes require structural recalculations to be performed and/or when design engineering input is required.
• Perform engineering evaluations on requests for deviation and provide either justification for use or repair procedures when applicable.
• Ensure production engineering assistance is provided in a timely manner so that the production schedule is impacted as little as possible. Production engineering response time is typically one business day.

To thrive in this role, you have:

• Bachelor of Science in Mechanical Engineering degree or similar degree with 5 + years' experience preferred.
• Experience designing/manufacturing mechanical systems; vehicle design/manufacturing (rail, aerospace, or automotive) preferred
• Fundamental knowledge of electrical, hydraulic, and pneumatic systems
• Practical machining and welding experience
• Knowledge of welded steel/stainless steel structures, design, and inspection methods (AWS D1.1 and EN 15085 preferred)
• Interpreting engineering level drawings, bill of materials (BOM), and Geometric Dimensioning and Tolerancing (GD&T)

What will make you stand out:

• Proficient in Creo CAD or similar 3D modeling software, with fundamental knowledge of structural FEA (Finite Element Analysis).
• Collaborate effectively with technical experts, suppliers, customers, and factory workers to determine optimal solutions and communicate efficiently both internally and externally.
• Demonstrates initiative in process improvement to better serve internal and external customers.
• Experienced in creating repair procedures and working in manufacturing environments.
• Capable of comprehending and constructively discussing analysis details related to welded structures, including static and fatigue loads, while providing production-focused input during issue resolution.

Applicants must be legally authorized for employment in the United States without needing current or future employer-sponsored work authorization.

Candidates should be willing to work in non-climate-controlled environments and inclement weather if required or if applicable.

Why you'll love working for Siemens!

• Freedom and healthy work-life balance– Health, Dental, Vision Insurance, HSA/FSA, Commuter Benefits – starting Day 1!

• We believe that each member of our team is accountable for making decisions, solving problems, and taking actions that contribute to long-term impact and financial success.
• We do the right thing. We stand for green innovations and meaningful solutions with impact on customers, ecosystem partners, society, and environment.
• We are frontrunners in digitalization and building platforms. Therefore, we are hiring ambitious forward-thinkers who want to have a real impact.
• Solve the world's most significant problems – Be part of exciting and innovative projects.
• Opportunities to contribute your innovative ideas and get paid for them! Take advantage of our Tuition Reimbursement program, Mentor Programs, and your development through online learning. We operate daily with a growth mindset - that's why Siemens consistently ranks on the Fortune World's Most Admired Companies list!
• Employee perks and discounts in addition to our 401k match and generous Paid Time Off
